The report finds that what are known as distributed energy resources can play a pivotal role in achieving Ukraine's 2030 energy goals. Though there are many uncertainties, it could meet these objectives by adding 24 GW of solar, 11 GW of wind and 6 GW of energy storage capacity this decade while maintaining surviving generation assets, based .

Ukraine's potential as a huge source of renewable energy makes this battle even more important. With the confidence of international investors and partners behind us, Ukraine can become a green energy hub for Europe as President Zelensky has suggested. In a world where renewable energy capacity grew by 50% globally last year, Ukraine has the space, skills, permitting regime and weather .
