# Poland fulcrum energy

## Overview

---

What is the energy transition in Poland?

Wholesale energy prices in Poland compared to other EU countries remain very high, and the economy's dependence on imported fossil fuels is growing rapidly. In the latest, seventh edition of the "Energy Transition in Poland" report, Forum Energii presents the state of transition play and a broader look at the overall process.

Does Poland have a helmsman for the energy transition?

The energy transition in Poland has no helmsman. There is no single centre to manage the process, so the changes taking place are chaotic. Poland has never offered a comprehensive vision for the decarbonisation of the economy or a plan to reduce dependence on energy resources imported from abroad.

Why is energy production increasing in Poland?

At the same time, energy production from natural gas increased, by more than 40%. This is a result of falling fuel prices and the flexibility of gas generation. Wholesale energy prices in Poland compared to other EU countries remain very high, and the economy's dependence on imported fossil fuels is growing rapidly.

How much energy has been cut in Poland this year?

From January to mid-May this year, the curtailment affected more than 400 GWh of energy. That's as much as nearly half a million households consumed in that period", said Marcin Dusiło, senior analyst at Forum Energii and the author of the report "Energy Transition in Poland".

Will Poland become a regional power hub?

Poland is the largest energy market in the region and has the biggest chance of becoming a regional power hub — transporting offshore wind electricity from Estonia, Latvia and Lithuania to demand centres in Silesia, Czechia,

Slovakia and Hungary.

How much money does Poland spend on energy?

Last year alone, Poland spent PLN 138 billion (i.e., slightly less than on defence). Over the past decade, taking inflation into account, the cost of fuel imports has already exceeded PLN 1.2 trillion. Energy driver needed right away The energy transition in Poland has no helmsman.

### **Fulcrum BioEnergy Creditors Push Back on Sale, Loan Proposals**

Fulcrum's proposed bidding procedures would sell its Sierra biofuels plant, a water treatment facility, and valuable power and water contracts. The proposals should be rejected because the sale timeline isn't adequate to market the assets, which will chill bidding and stifle competition, a group of unsecured creditors said in an objection

## **Waste-to-Fuel Company That Raised \$1 Billion Verges on Collapse**

(Bloomberg) --Fulcrum BioEnergy, a clean-fuels pioneer that raised more than \$1 billion to turn household waste into lower-emitting fuels for planes and trucks, is in danger of going under. The company recently laid off nearly all of its staff of about 100 and halted most of its operations, according to more than a half-dozen former employees.

## **Waste-to-Fuel Company That Raised \$1 Billion Verges on Collapse**

Fulcrum was the first company to take shredded landfill waste, gasify it and then convert it into a liquid fuel. While technically challenging,

garbage-to-fuels has long been tantalizing. That's because household waste is abundant and cheap, and it doesn't require additional acres for growing energy crops.
