# Poland renuvi energy

## Overview

---

How will Poland meet its res obligations?

To meet Poland's 2020 and 2030 RES obligations, the Polish government plans extensive development of its offshore wind farms. The Polish Energy Policy (PEP) Road Map 2040 provides for a visible participation of offshore wind in Poland's 2027 energy mix, and the first mature projects should appear by 2024.

How many PV roofs will Poland install in 10 years?

Market experts predict that within next 10 years, Poles will install nearly 1 million individual PV roofs with a capacity of 50-100kW capacity. Large PV investors are supported by the government via RES auctions, which have been organized each year since 2016 by the Polish Energy System Regulator.

How many wind installations are there in Poland?

There are more than 1,200 installations in Poland using wind as a renewable energy source with a capacity of more than 6 GW. These installations account for about 65% of Poland's renewable energy capacity. Nearly 160 additional wind installations are under construction, with total installed capacity of approximately 2,500 MW.

Will new technologies be needed to decarbonise Poland?

New techniques and technologies will be needed to decarbonise these areas. Coal dominates the power sector of Poland, where it is the largest source of greenhouse gas emissions and a major employer. While the country has experienced strong growth in renewable energy over the past decade, the future looks uncertain.

Will Poland be able to generate electricity from offshore wind farms?

A law promoting electricity generation by offshore wind farms was adopted by the Polish parliament and signed by President Duda on January 21, 2021, and

companies controlled by the Polish State Treasury will have a dominant share in developing offshore wind farms.

Will offshore wind be part of Poland's 2027 energy mix?

The Polish Energy Policy (PEP) Road Map 2040 provides for a visible participation of offshore wind in Poland's 2027 energy mix, and the first mature projects should appear by 2024. In the 2040 prospectus, the strategic document sets the potential of 10.3 GW.
