Lead-Acid Battery Replacement , Protect Your Power System

The typical VRLA battery's capacity begins to drop off after three years of use, and the drop becomes even steeper after five years. Between years three and five, the battery is considered to be in a phase of critical deterioration. Life span of a VRLA battery. When a Lead-acid battery reaches 80% capacity, it is considered at the end of life

True Long-Life VRLA Battery(TM)

The msEndur II is the latest advancement in VRLA battery technology. By combining the service life reliability of a flooded battery with the performance energy density of a valve-

regulated battery, C& D has created the msEndur II - The True Long-Life Battery(TM).

British Indian Ocean Territory: Negotiations

On Thursday 3 October, my right honourable and learned friend the Prime Minister and Mauritian Prime Minister Jugnauth made an historic announcement: after two years of negotiations and decades of disagreement, the United Kingdom and Mauritius have reached a political agreement on the future of the British Indian Ocean Territory. The treaty is neither ...
