# Repair photovoltaic cracked panels

## Overview

---

Solar panels are usually damaged by severe weather conditions, such as hail storms, hurricanes, and tornadoes. They can also be damaged by falling trees or branches. In some cases, solar panels can be damaged by vandalism or accidents. If your solar panel is damaged, it is important to have it repaired or replaced as.

The glass on a solar panel can be replaced if it is cracked or broken. However, it is important to note that the replacement glass may not be as durable as the original glass. It is also important to have a qualified technician.

Solar panels are designed to last for many years, but they can degrade over time due to exposure to the elements. The most common cause of degradation is weathering, which can occur when the panels are exposed to.

The first step is to identify the broken solar panel. Once you have found the broken solar panel, you will need to remove it from the system. To do this, you will need to disconnect the power.
