Russia pm solar scheme

Overview

When will Russia introduce a new net metering scheme?

At the beginning of March 2021, the Russian government has introduced a new net metering scheme for solar, wind and other renewable energy generators not exceeding 15 kW in size.

Is solar energy on the verge of a major expansion in Russia?

Vadim Braidov / TASS Solar energy in Russia might be on the verge of a major expansion, thanks to a government support program for renewable energy sources, industry experts told The Moscow Times. Russia, the world's fourth-largest emitter of greenhouse gases, has historically relied on its vast oil and gas reserves to bolster its economy.

Does Russia have enough solar energy?

'There is no sun there!' Well, our data tells us differently." Moscow-based renewables company Unigreen Energy, which has received a government guarantee that it will be paid extra for the power it adds to local grids, said Russia has more than enough insolation — solar radiation hitting an object — to produce solar energy.

When will the solar PV market grow in Russia?

We will send a sample as soon as possible. The Photovoltaic (Solar PV) Market in Russia is expected to grow in the period 2021 - 2030. Government plans of Russia include the development of the solar PV sector.

Will Russia's solar energy program end in 2024?

"This capacity matches with Russia's first incentive program started in 2014 and that is set to end in 2024," Anton Usachev, president of the Russian Solar Energy Association, told pv magazine. "Apart from grid-connected PV, off-grid solar installations totaling 17 MW were also deployed last year."

Will Russia's energy policy change?

The Omsk, Altai and Zabaikalsky regions, the republic of Sakha and other locations in Siberia and Russia's Far East launched their first solar plants in recent years, according to Tatiana Lanshina, the director of think tank Target Number Seven Association. However, she added that so far there are no signs of major changes in state energy policy.
