Overview of Russia photovoltaic (solar PV) market development 2010 ÷ 2030; Development scenario of Russia photovoltaic (solar PV) sector until 2030; Major active and upcoming solar PV power plants in Russia; Current market prices of fully permitted and operational solar PV projects.

Even though demand for solar energy in Russia is low, the Moscow-based company, Hevel, is producing solar modules with an energy conversion efficiency of 22 percent, which is the world's.

In Russia, electricity generation in the Solar Energy market is projected to amount to 3.58bn kWh in 2024. An annual growth rate of 12.22% is expected during the period from 2024 to 2029.

As of July 2023, the Russian company Unigreen was projected to become the leading solar power energy investor in Russia under the second capacity supply agreement (CSA) for renewable energy. Does Russia have a solar PV market?

According to GlobalData, solar PV accounted for 0.61% of Russia's total installed power generation capacity and 0.22% of total power generation in 2021. GlobalData uses proprietary data and analytics to provide a complete picture of this market in its Russia Solar PV Analysis: Market Outlook to 2035 report. Buy the report here.

How much solar energy does Russia produce?

Russia's share of solar energy production is a paltry 0.03 percent of the country's total, and to meet its electricity needs the country relies heavily on traditional energy sources with high conversion efficiency, such as gas, oil, hydro and nuclear. Nevertheless, in the past three years Russia has been rapidly developing solar energy.

Is solar energy a good investment in Russia?

Even though demand for solar energy in Russia is low, the Moscow-based company, Hevel, is producing solar modules with an energy conversion efficiency of 22 percent, which is the world's highest. In addition to Hevel, only two other companies in the world produce solar equipment with similar efficiency: Panasonic (Japan), and Sun Power (U.S.).

Does Russia have a solar power plant?

Nevertheless, in the past three years Russia has been rapidly developing solar energy. Kosh-Agachskaya solar power plant in the Republic of Altai was opened in 2014. In 2014, Russia opened its first solar power plant, and the country has 12 today. Soon the 13th will be launched.

How many solar power plants will Russia use in 2022?

In the near future, Russia plans to use another 334 MW of solar power in the Orenburg, Saratov, Volgograd and Astrakhan regions, as well as in the Altai, Buryatia and Bashkortostan republics. By 2022, Hevel plans to build solar power plants with capacity of up to 1 GW.

Do you need a subscription to access solar power in Russia?

A paid subscription is required for full access. As of July 2023, the Russian company Unigreen was projected to become the leading solar power energy investor in Russia under the second capacity supply agreement (CSA) for renewable energy sources (RES) by 2035.
