Sardinia solar energy North Macedonia

Overview

How much solar power does North Macedonia have?

Solar power Built on a former lignite open pit mining site, North Macedonia's Oslomej solar park will have an installed capacity of 120 MW when fully completed. © Ciril Jazbec.

How much electricity does Macedonia produce?

ESM, a public electricity generation utility owned by the government of North Macedonia, provides 90 per cent of the country's domestic electricity production – about 3,600 GWh from two thermal power plants and 1,250 GWh from eight hydropower plants.

Will VCIG acquire a solar farm in North Macedonia?

VCI Global has engaged the consulting firm OTB Solutions Dooel Skopje in North Macedonia to identify and secure additional solar farm opportunities. "This is the beginning of a series of solar farm acquisitions that VCIG will undertake and looking ahead for more acquisition opportunities across Southeast Asia and Europe.

What are the decarbonisation plans in North Macedonia?

Decarbonisation plans in North Macedonia are taking a big leap forward. The European Union (EU) is supporting ESM, the state-owned electricity company, to implement a 30 MW photovoltaic (PV) project consisting of 10 MW on a portion of the exhausted coal mine of thermal power plant Oslomej, and 20 MW adjacent to the thermal power plant Bitola.

Is North Macedonia a good place to invest in green energy?

Dimitar Kovačevski, Prime Minister of North Macedonia: "It is really a great pleasure to be here today, where once a big environmental polluter was located and now we are producing green energy. The benefits of this investment are manifold.

Does North Macedonia need a coal phase-out?

Even though the country has historically been dependent on lignite coal mining for around 30% and gas imports for an additional 15% of its electricity production, it has nonetheless set very ambitious goals for decarbonization. As part of the Powering Past Coal Alliance, North Macedonia has committed to a coal phase-out by 2027.
