Saudi Arabia brevia energy power

Overview

How does Saudi Arabia generate electricity?

According to Nicolas Daher, the EIU's lead energy analyst, Saudi Arabia "currently generates almost all of its electricity from fossil fuels, of which 60% comes from natural gas and about 40% from oil". By 2030, it aims to achieve a true energy mix for electricity production, with renewable energy contributing around 50%.

How much power does Saudi Arabia need?

Saudi Arabia has established a goal to source at least 50 percent of its power from renewable energy by 2030, expanding its capacity to 130 gigawatts (GW), 58.7 GW of which is expected to come from solar and 40 GW from wind. This target is the most ambitious of its kind among Gulf Cooperation Council (GCC) countries (Figure 1).

Does Saudi Arabia need a natural gas power plant?

Saudi Arabia seeks to increase its electricity generation capacity from natural gas and renewable energy sources as part of the country's Vision 2030.³ The Saudi Power Procurement Company (SPPC) awarded bids for four natural gas-fired power plant projects in October 2023 and began receiving bids for four additional projects in January 2024.

How is energy used in Saudi Arabia?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

How much oil does Saudi Arabia use for power generation?

Saudi Arabia burns more crude oil for power generation than any other country. In 2015, its average use of oil in power generation peaked at 0.9 MMb/d. In 2018, it reported its lowest average of crude oil used for power

generation since 2009 at 0.4 MMb/d, 41% lower than in 2015 (EIA 2020).

Does Saudi Arabia have an electricity interconnection project with Iraq?

In partnership with the Gulf Cooperation Council Interconnection Authority (GCCIA), Saudi Arabia officially launched a 1-GW electricity interconnection project with Iraq in 2023, connecting Arar, in northern Saudi Arabia, with Baghdad.³⁸ Saudi Arabia expects an electricity interconnection project with Egypt to be fully operational by 2026.
