Overview

What is Scaling Solar?

Scaling Solar brings together a suite of World Bank Group services under a single engagement aimed at creating viable markets for solar power in each client country. The “one-stop shop” program aims to make privately funded grid-connected solar projects operational within two years and at competitive tariffs.

Which countries have signed up for Scaling Solar?

nd transparent procurement process. Within 18 months of the formal launch of Scaling Solar as a business line in June 2015, four nations in sub-Saharan Africa (SSA) had signed up for the program (Zambia, Senegal, Madagascar and Ethiopia), with many other countries expressing strong int.

Does Scaling Solar impact process design & organization?

In all cases, the Scaling effort in process design and organization had a meaningful and long-lasting impact. Here we consider one of these experiences—Scaling Solar—in more detail. This case study accompanies four other case studies and an Executive Summary, and provides insights and key takeaways that are directly applicable to other countries.

How has Scaling Solar changed the world?

f new generation capacity of 88 MW. IFC mobilized financing of more than \$50 million, including concessional loans from the C nada Climate Change Program (CCCP). Scaling Solar has achieved important reductions in the tariffs and timelines of solar projects and mobilized new investors int.

What is a scaling approach?

ipeline of infrastructure projects. The essence of the Scaling approach is to develop a robust public-private partnership (PPP) model for single deal and then replicate it. This spreads costs, enhances impact, and encourages

programmatic, competitive tendering, with faster delivery and lower price
