Seido energy Sri Lanka

WORKING PRINCIPLE

Overview

Does Sri Lanka use wind power?

Sri Lanka's history of using wind power dates back to the 3rd century B.C. and as showcased in Fig. 2 the country currently boasts over 5000 km² of windy areas that are considered to have excellent wind resource potential areas (Sri Lanka Sustainable Energy Authority Ministry of Power and Energy, 2019).

Does Sri Lanka need solar power?

Primarily, Sri Lanka has the required resource potential – particularly wind energy and solar energy resources. Even with the potential lands of solar power development alone, the electricity generation capacity for a foreseeable future period can be met.

What is USAID's Sri Lanka energy program?

“USAID, through the Sri Lanka Energy Program, aims to introduce clean energy and reduce excess energy use across Sri Lanka. This portal is a critical tool that will support USAID investments to power an energy sector that is secure, efficient and sustainable,” he said.

Does Sri Lanka have a power grid?

Sri Lanka has already achieved a grid connectivity of 98 percent, which is relatively high by South Asian standards. Electricity in Sri Lanka is generated using three primary sources: thermal power (which includes coal and fuel oil), hydropower, and other non-conventional renewable energy sources (solar power and wind power).

What are Sri Lanka's energy policies & strategies?

Sri Lanka's energy policies and strategies strongly focus on developing conventional and nonconventional renewable energy sources for generating power. Promoting domestic energy resources has become one of the main policy components in Sri Lanka.

Is Sri Lanka implementing a floating solar pilot project?

In a pioneering effort, Sri Lanka Sustainable Energy Authority is currently implementing two floating solar pilot projects, each with a capacity of 1 MW in Kiriibban Wewa in the Monaragala district and Chandrika Wewa in the Rathnapura district.
