

## Solar Energy South Africa

# Self-built solar power generation factory

## Overview

---

There is an increasingly active introduction of solar energy technologies in various sectors of the economy. In particular, manufacturing enterprises from many industries often use solar power plants to generate “green” electricity both for their own consumption and for sale to other companies or state-owned.

The return on investment in the construction of a solar power plant for a manufacturing enterprise (plant, factory, workshop) depends on many factors. First of all, it is the installed capacity of a solar power plant, which is.

Avenston Group has been building solar power plants since 2010. We have assembled a professional team of specialists working in this.
