Serbia 360 energy

Overview

What type of energy is used in Serbia?

Energy in Serbia is dominated by fossil fuels, despite the public preference for renewable energy. Serbia's Total Energy Supply is almost 700 PJ, with the energy mix in 2021 comprising coal (45%), oil (24%), gas (15%), and renewables (16%).

What is Serbia's energy investment plan?

The Ministry of Mining and Energy has announced a €15 billion investment plan for the electricity sector in next several years, expecting to reach more than 3 GW of renewable energy production plants. The main players and investors in the Serbian Energy Sector are:

What should Serbia do with the electricity integration package?

Serbia should focus on the transposition and implementation of the Electricity Integration Package as a precondition for the coupling of its short-term markets. Serbia should certify the gas transmission and storage operators, grant third party access at the interconnection points, and remove any other obstacles to new market entrants.

How much electricity is consumed in Serbia in 2022?

Traded volumes on the day-ahead market were increasing and resulted in 10,5 TWh in 2022. This amounts to over 30% of final electricity consumption. The state-owned company producer and supplier Elektroprivreda Srbije (EPS) continues to be a dominant player in the Serbian electricity market.

What is the legal setup of the Energy Agency of Serbia?

The legal setup governing the Energy Agency of the Republic of Serbia (AERS) is largely in line with the Energy Community legislation. However, the autonomy of the management related to internal organization and the use of the annual budget is limited by the requirement of the Parliament to adopt

statutes and hire additional staff.

Should Serbia certify the gas transmission and storage operators?

Serbia should certify the gas transmission and storage operators, grant third party access at the interconnection points, and remove any other obstacles to new market entrants. Serbia submitted its draft NECP within the prescribed deadline and adopted its long-term strategies on low-emission development building renovation strategy.

360Energy , Home , Energía Solar Argentina

360Energy es una empresa líder en el desarrollo, construcción, montaje y operación de Parques Solares Fotovoltaicos en Argentina. La energía solar es la protagonista de la transición energética. Trabajamos a diario, generando la energía del futuro a partir de una fuente renovable. Brindamos servicios de MATER, IRECs, MEM, EPC, O& M y GH2.

Portfolio

Serbia is expected to rapidly transition its production of energy from fossil fuel to renewable energy. Emergy, along with a local partner, is developing Alibunar, which is the most advanced project in our portfolio and will have an installed capacity of 168 MW. The Banat wind projects (I-V), and the Zabalj PV solar project will have a

Serbia signs major contract for 1 GW self-balancing

Minister of Mining and Energy Dubravka Djedovic and Dusan Zivkovic, General Director of the state-owned power utility EPS, have signed a contract with a consortium comprising Hyundai Engineering and UGT Renewables (UGTR) for a significant project to develop self-balancing solar power plants in Serbia.. The initiative aims to construct large ...

About Us

Our commitment to excellence drives us to continuously innovate, adapt, and evolve. Whether you're navigating new and exciting low carbon solutions or looking to reduce operating emissions, THREE60 Energy is here to support your journey to net zero. We look forward to partnering with you on your energy journey.

[Vladan Komatovic](#)

The total installed capacity of all prosumers who have all the necessary permits and status in the official registry has exceeded 50 MW, thus becoming a very significant factor in Serbia's energy transition. This significant milestone indicates the increasing acceptance of renewable energy sources in the country.
