Sharp trunk storage box can be cut

Overview

How do you transport a Sharps bin?

Transport the sharps bin safely using a sharps tray, wheeled holder (i.e. for large bins) or trolley mounted fixture. Always close the temporary sliding closure following sharps disposal. Safe disposal is the responsibility of the user. Dispose of sharps bins when $\frac{3}{4}$ full. Lock aperture securely before disposal.

Are wall and trolley mounted Sharps bins safe?

Wall and trolley mounted sharps bins must be at a safe user height – the aperture must be visible. Only use wall and trolley fixtures that are designed for the sharps bins in use.

What is a Sharps box?

The sharps box is designed for the safe disposal of needles or any other sharp or broken materials. It is for the use of health professionals or appropriately informed patients only. The sharps box is a yellow container, which can vary in size and may have either a red, yellow or purple lid.

Should the Sharps box lid be closed?

The sharps box lid should be partially closed but not fully closed, as this will cause it to self-lock. Everyone in your household and visitors must be made aware of the sharps box and the safe storage instructions.

How should a Sharps box be stored?

You must ensure that the sharps box is stored in a safe area away from children or pets. Please obtain further advice from the nursing staff who are visiting you. The sharps box lid should be partially closed but not fully closed, as this will cause it to self-lock.

What is a sharpsmart reusable container?

Backed by clinical evidence and independent peer-reviewed studies, the Sharpsmart reusable container is the epitome of safety in sharps disposal; developed in partnership with clinicians and expertly crafted to be the most advanced sharps container on the market.
