Sienza Energy Snags Series A For Battery Technology

Friday, February 18, 2022 Sienza Energy Snags Series A For Battery Technology. Pasadena-based Sienza Energy, a startup working on lithium battery technology, said on Thursday that it has raised part of a Series A funding round from billionaire Patrick Soon-Shiong. Size of the funding was not announced. According to the company, the funding comes on top of earlier ...

**Caltech-Incubated Company
 Addresses EV Battery Safety
 Concerns**

Sienza's unique 3D electrode nano-architecture, high energy and power density, and long cycle life far exceed industry standards when combined with high-quality silicon -- even at fast charging rates. In March, Dr. Patrick Soon-Shiong said, "Sienza's successful use of pure nano-silicon has created a new paradigm in battery technology." Dr.

Sienza Energy ist ein von California Institute of Technology (Caltech) gegründetes Batterie-Unternehmen und wird unter anderem vom Philanthropen Patrick Soon-Shiong unterstützt, der in Los Angeles ansässig ist. Gerard Koning, Leiter der niederländischen Delegation, äußerte sich positiv über die einzigartige Batteriearchitektur von Sienza

Angola

It also includes non-energy uses of energy products, such as fossil fuels used to make chemicals. Some of the energy found in primary sources is lost when converting them to useable final products, especially electricity. As a result, the breakdown of final consumption can look very different from that of the primary energy supply (TES).
