

## Solar Energy South Africa

# Sierra Leone power back up solutions

## Overview

---

The study's resulting recommended adaptations for Sierra Leone's power grid based on potential climate change impacts include:

- Relocate critical assets
- Use heat-tolerant technologies and materials for critical T&D segments that stand to lose efficiency
- Reinforce towers and create deeper foundations for substations due to risk of flooding
- Implement nature-based solutions such as vegetative buffers to protect transmission lines from wildfire
