How Much Does Solar Control Glass Cost?

Currently, solar control glass is available as clear glass, tinted in a variety of tones, or with a mirror finish, and is inarguably effective at what it is intended to do. However, cost may be an issue. Meeting current Building Regulations is highly likely to require Low-E glass as a minimum. This is .

Hi Will, I think Solar control glass is well worth it, it makes a big difference. As for the cost, that can be a very difficult subject. I live in the South West and asked for several quotes for 4 sheets of SC glass to be fitted to a 2.7m x 2.6m conservatory. They were around the £5k area. That's £1250 per sheet of glass, ridiculous price.

Control temperatures in your space with our solar control window film. If you're looking for a cost effective way to keep your home warm during winter, or to reduce heat during summer, solar control film is your answer. Does solar control offer free UK shipping?

Who makes solar control glass in the UK?

There are two main manufacturers of solar control glass in the UK right now: Saint-Cobain and Pilkington. In terms of effectiveness, it is difficult to find a difference between the two, and both offer products with a tinted, mirrored or clear appearance.

Is solar control glass a good option?

Currently, solar control glass is available as clear glass, tinted in a variety of tones, or with a mirror finish, and is inarguably effective at what it is intended to do. However, cost may be an issue. Meeting current Building Regulations is highly likely to require Low-E glass as a minimum.

What is solar control glass?

34% OFF on all PVCu windows and doors! Solar control glass is a special type of glazing that reflects heat while maintaining natural light. Builders use solar control glass in many projects where high temperatures are likely, such as in a conservatory or other window systems that use a lot of glass. How Does Solar Glass Work?

.

How much does a double glazed solar system cost?

A double-glazed unit with Low-E glass is likely to cost under £50/m², while that same unit with an outer pane of solar control glass is likely to cost in excess of £130/m². As for the retrofitter, this cannot be considered a DIY job, as the pane has to be incorporated into a double-glazed unit, with that unit then being fitted into a frame.

Does solar control glass reduce air conditioning?

Reducing the need for air conditioning: In the summer months, solar control glass means you are less likely to require air conditioning – or at least will rely on it less. As a result, solar control glass is a form of energy-efficient glazing that can substantially reduce both heating and cooling bills.
