Solar edges Heard and McDonald Islands

Overview

Heard Island and McDonald Islands (HIMI) were first discovered in 1947. In 1997, the islands were declared a World Heritage Site. The islands are part of the that includes several islands. In this cold climate, plant life is mainly limited to grasses, lichens, and . Low plant diversity reflects the islands' isolation, small size, severe climate, the short, cool growing season and, for Heard Island, substantial permanent ice cover. The main environmental deter.
