

Solar Energy South Africa

Solar farm Turks and Caicos Islands

Overview

How many rooftop solar PV systems will be installed in Turks & Caicos?

The contract outlines the installation of five rooftop solar PV systems, with battery energy storage and accessories at the following critical public facilities: These rooftop solar PV systems are specially designed for resilience to withstand fierce climatic conditions in the Turks and Caicos Islands.

Can Turks and Caicos use solar power?

The Turks and Caicos Government and Fortis TCI are currently reviewing the electricity legislation to enable Turks and Caicos residents to use the solar power they produce to offset their power consumption (rather than sell everything back to Fortis at their pre-agreed rate).

What is transforming to green energy in the Turks and Caicos Islands?

The “Transitioning towards Green Energy in the Turks and Caicos Islands” project falls within the development activities of the RESEMBID programme, which is 47-project programme funded by the European Union and implemented by Expertise France - the development cooperation agency of the Government of France.

What is happening in the Turks & Caicos Islands?

The Turks and Caicos Islands (TCI) Government continues to move towards a more sustainable and secure future with the execution of the Contract Agreement by HE Governor Dileeni Daniel-Selvaratnam for and on behalf of the TCI government and the contractor, Green Revolution Ltd, for the installation of five (5) solar photovoltaic systems.

Sustainability Initiatives in Turks and Caicos Islands

They are looking to open a solar farm in 2024 and to be 100 percent sustainable by 2028. Perhaps most impressively, they have pushed back against pressure to expand their hotel to accommodate more visitors and more income. A rare feat of prioritizing planet over profits.
