

Overview

Did a Queensland solar installer die after a workplace accident?

The tragic incident comes less than two weeks after a solar installer in Queensland died following a workplace accident in Brisbane. Queensland police said a 43-year-old man had suffered fatal injuries on 29 June 2023 when he fell several metres and landed on concrete after crashing through the roof of a workplace in Wynnum in Brisbane's east.

What happened if a solar panel installation was wet?

He was sent to the hospital and died on the same day. Preliminary investigations revealed that the cable was lying on the roof, which was wet due to rain before the incident. Figure 1: Scene of the accident. Electrocution is a major concern during the installation of solar panels.

What happened to SN Aboitiz Power's floating PV demonstrator system?

Floating PV demonstrator system for SN Aboitiz Power. Image by: Ocean Sun SA. Norwegian floating solar technology developer Ocean Sun said it is repairing severe damage to Statkraft's first unit of a floating solar plant located at the Banja reservoir in southeastern Albania.

What causes a battery enclosure to explode?

The large explosion incidents, in which battery system enclosures are damaged, are due to the deflagration of accumulated flammable gases generated during cell thermal runaways within one or more modules. Smaller explosions are often due to energetic arc flashes within modules or rack electrical protection enclosures.

What happened to the three inverters used for the solar plant?

The three inverters used for the solar plant. Maintenance teams quickly identified the source of the fire. Indeed, traces of wear on the cables that connect the modules to the transmission terminals had been observed since

October 2021.

What happened at Wellington North solar farm?

A coroner's report is to be prepared following the death of a 41-year-old man following a "workplace accident" at the Wellington North Solar Farm being constructed near Dubbo in western New South Wales.
