# Solar panel on the roof Serbia

## Overview

---

Who are the 'prosumers' of solar energy in Serbia?

Her four-person household is one of the first "prosumers" of solar photovoltaic (PV) energy in the country. Prosumers are households that produce and consume electricity from their own solar plants, even if these plants are made up of just a few panels. In Serbia, home-generated energy in excess of a household's needs is sent to the grid.

Is solar energy a good investment in Serbia?

The independent Belgrade-based Environment Improvement Center estimates that the potential of solar energy in Serbia is 30% higher than in Central Europe. In Serbia, however, says energy efficiency expert Slobodan Jerotic, the question is really how many households can afford to invest €5,000–6,000 in solar power systems.

Does Serbia have a prosumer model?

In Serbia, the prosumer model only became feasible for private households this year. And with changes to the Use of Renewable Energy Sources Law, the state finally created a system that was ostensibly designed to motivate citizens to try their luck with solar power. But the system was flawed.

What does a prosumer do in Serbia?

Prosumers are households that produce and consume electricity from their own solar plants, even if these plants are made up of just a few panels. In Serbia, home-generated energy in excess of a household's needs is sent to the grid. In return, the prosumer receives credits against future energy purchases from the utility company.

How many solar panels are on Dragana Maricic's house?

Late last year, after much saving and planning, 16 460-watt solar panels were finally bolted to the roof of Dragana Maricic's two-story house in the town of

Ruma in northern Serbia. These solar panels contain solar cells that generate electric power.
