Solar parking Palestine

Overview

Who is solar parking?

Solar Parking specializes in transforming conventional parking spaces into sustainable and green energy producing units. We expertly carry out projects all around the world with the most efficient price point in the market. We offer a wide variety of business models to meet the preferences of different customers.

Does Palestine have a potential for solar power?

The Palestinian territory has a high potential for solar power generation, as it receives around 3,000 hours of sunshine per year. As a result, the Palestinian Authority is looking to attract investments in the renewable energy sector. Inauguration of the solar power plant in a school in Beit Hanina, Jerusalem.

What is the energy problem in Palestine?

The energy problem in Palestine is one of many issues that affect the social and economic conditions of the Palestinian people. The fact that most of the energy is imported at relatively high prices places more financial burdens on poor and marginalized people.

How can Qudra help bridge the energy gap in Palestine?

By expanding solar access, Qudra is helping bridge this energy gap, enabling communities to thrive and industries to grow. Operating in Palestine presents unique challenges, particularly in securing financing and dealing with the political complexities that often disrupt the region's economic stability.

Where is electricity supplied in Palestine?

Table 1: Sources of Electricity in Palestine Based on Yearly Consumption (PCBS 2019). The West Bank is mainly supplied by three 161/33 kV substations: one in the south close to Hebron; another one in the central West Bank, near the town of Salfeet, close to Nablus; and a third in the northern part of Jerusalem.

How much electricity does Palestine use?

Electricity supply and demand According to the Palestinian Central Bureau of Statistics (PCBS), the total electrical energy consumption in Palestine in 2019 was reported to be 5,929.5 GWh. This quantity is almost entirely imported from outside sources, mainly from the Israel Electric Corporation (IEC), as shown in Table 1.
