

Solar Energy South Africa

Solar power generation is sold to the grid

Overview

You need to have a renewable electricity generating system that meets the SEG eligibility requirements. You must have a meter capable of providing half-hourly export readings. This would typically be a smart meter. Speak to your energy supplier about getting a smart meter installed if you do not already have one.

You need to apply directly to a SEG tariff supplier to get paid. The OFGEM website lists the energy suppliers that provide SEG tariffs. Your SEGtariff supplier does not need to be the same as the supplier that provides your energy.

Use the Energy Saving Trust calculator to estimate: 1. how much you could save from solar panels or other renewable electricity generating systems 2. how much you could earn selling unused energy back Although you.

Solar power generation is sold to the grid

Solar Net Metering Explained: All You Need to Know

Converts Solar Generation Into Power Bill Savings. Only the value of the solar power you use directly may be saved in the absence of net metering. Simply put, feeding extra energy into the grid is like giving it away ...
