

## Solar Energy South Africa

# Solar power steering wheel

## Overview

---

Can solar panels power a car?

The solar panels use SunPower cells that can deliver 23 per cent efficiency to power a pair of 6kW motors specially built for the car. The battery is a compact 16kWh lithium-ion unit, saving even more weight.

Can solar power power a concept car?

It's no surprise then that solar power has formed an important part of the mix in its range of experimental concept cars. Venturi billed the Eclectic as the 'first autonomous urban vehicle' upon the car's launch in 2006, although it retained a steering wheel because the 'autonomy' is from conventional power sources rather than a driver.

What are the benefits of solar-powered cars?

The potential benefits of solar-powered cars are clear. The sun is an abundant source of clean, free energy. All we have to do is capture it and use it to get about the place. If only it were so easy. With current technology, you need a lot of solar panels to generate enough electricity to power a car.

How much solar power can a car drive?

It's clear that a big determining factor in how far and how quickly solar power can allow a car to drive is the efficiency of that car, and some of the latest solar-powered cars are pushing the boundaries of efficiency in a way that can benefit all EVs. The Lightyear 0 can average 7.5 mi/kWh compared to the 4.4mi/kWh of a Tesla Model 3.

Can a solar roof power an electric car?

It's telling that a solar roof features in the highly aerodynamic design, running from the top of the windscreen right down to the car's tail. The EQXX is another exponent of solar power as a useful efficiency aid for electric cars rather than a vehicle designed to employ solar as a primary power source.

Who invented solar cars?

In 1955 William G Cobb of General Motors exhibited the Sunmobile, a 15-inch model car with 12 solar cells that generated electricity to directly drive its motor. In 1962, Charles Escoffery created what's thought to be the world's first full-size solar-powered car by retrofitting solar panels to the roof of a 1912 Baker electric car.
