Solivus solar British Virgin Islands

Overview

Who is solivus solar?

Solivus designs and creates solar products for the home and bespoke solar solutions for businesses. Solivus, the pioneer of new 'skin-like' solar panels, has secured £2.4m investment, led by Founders Factory and G-Force and supported by Crowdcube investors, to fund expansion plans putting solar power at the heart of the UK's energy generation.

Who are solivus?

The Solivus team consists mainly of installers and product innovators using best-in-class thin-film solar panels. We aim to enable mega buildings and homes to decarbonise and secure their energy supply. We work with the best solar panel manufacturers, establishing preferential agreements and we own our own IP for our Solivus products.

How much money has solivus raised?

Solivus raised investment following a 480% oversubscribed Crowdcube campaign, bringing the total the business has raised to £5m. Solivus designs and creates solar products for the home and bespoke solar solutions for businesses.

What is solivus doing at Cotswold Airport?

This year, Solivus is ramping up installations including an installation at Cotswold Airport on aircraft hangars. The solar panels from this installation will generate on-site energy to power an electrolyser used to create hydrogen from water. The hydrogen will in turn be used as super green fuel to power new electric planes.

Does solivus install solar on commercial roofs?

Solivus installs lightweight solar on commercial roofs that can't take the weight of conventional solar. Solivus has the Solivus Arc for domestic

customers who want an aesthetic super clean ground mounted solution for their home . What's in store for the future?

.

What is solivus arc?

Solivus is creating a revolutionary solar energy solution for homeowners. The Solivus Arc. Solivus® can provide storage solutions to meet current and future energy needs through our choice of carefully selected partners- from storing cheap off-peak energy through to customers enjoying grid-balancing income from batteries.

Utility for British Virgin Islands seeks EPC to build solar and ...

The utility for the British Virgin Islands is prequalifying engineering, procurement and construction (EPC) firms as it prepares to build a

4-MW solar and storage microgrid in Paraquita Bay, Tortola. Interested companies can respond to a request for qualifications issued by British Virgin Islands Electricity. Applications are due Jan. 7, 2022.

A new dimension: how the future of solar energy could be shaped ...

The organic and strikingly curvaceous future of solar panel design in the UK just might have been born in a garden in Kent. While Sir Isaac Newton had his apple tree in the 17th century, British inventor Jo Parker-Swift has her laurel bushes in the 21st. The result was a beautiful, three-dimensional solar panel structure, the Solivus Arc
