Overview

What is the Solomon Islands national energy policy - 2019 - 2030?

The Solomon Islands National Energy Policy : 2019 - 2030 contains strategic direction and key priorities for the development of the energy sector in the next 10 years which will enable a transition to sustainable economic development in the country. There are no upcoming events. You can check back soon. Thank you.

What are the goals of the Solomon Islands national energy policy?

Solomon Islands National Energy Policy 2014 2 Sub sector Goals Estimated budget (USD million) Planning, coordination, leadership and partnership Strengthen the energy sector leadership and planning 4.18 Electric power (urban) Increase access to electricity in urban areas to 100% by 2020 64.0.

Who manages the electricity sector in the Solomon Islands?

I Policy details The electricity sector is managed by the government-owned company, the Solomon Islands Electricity Authority (SIEA). SIEA is totally dependent on diesel for power generation; 80% of energy is produced for Honiara while 20% is for outstations in eight provincial centres. SIEA has a total of 14,000 customers in 2013.

Why is energy important in the Solomon Islands?

Energy is included in the Solomon Islands National Infrastructure Investment Plan and the National Development Strategy as being integral and important for achieving the goals they have set. Energy is a key driver of economic growth, social development and improvement in the livelihood of communities.

What are the challenges and opportunities in the Solomon Islands?

Solomon Islands has its own challenges and opportunities in terms of our energy situation. Our extremely low national electricity coverage, high energy

costs and high dependence on imported fossil fuel are exacerbated by the geographical spread of the archipelago, and this adversely affects our economic and social development.

Why is the power supply in the Solomon Islands so volatile?

Currently, most of the power in the Solomon Islands is dependent on diesel generated power which uses imported fuel. This volatile energy supply structure is susceptible to soaring fuel prices, and the people want it to be rectified as soon as possible.
