

Solar Energy South Africa

Spark energy Lesotho

Overview

Does Lesotho need electricity?

The country is renowned for an abundant supply of unspoilt and unexploited water resources, capturing approximately 50% of Southern Africa's total catchment run-off, therefore, hydropower contributes to most of its electricity needs . When it comes to energy access, Lesotho is considered one of the lowest in Africa .

What does the Department of energy do in Lesotho?

The Department of Energy is committed to increasing energy access and ensuring security of energy supply in the country. The Department of Energy is tasked with promotion and implementation of renewable energy projects and programs. A website of the Department of Energy (DoE) in Lesotho with an Energy Management Information System (EMIS).

What makes spark a great energy company?

We know that when it comes to energy, customers want to start small and scale up as and when they can afford. At Spark we incorporate true modularity. This means we're don't just offer customers a single expansion offer. We enable them to take on as much as they can afford, when they need it and in 2022 we put this into practice.

What will spark batteries do for You?

Spark Batteries will now be part of a flexible energy grid that powers homes, businesses and small factories. Solar power will no longer be the only renewable generation option. Wind, biogas and other solutions will be available too. Interested?

.

Does spark offer a single expansion offer?

At Spark we incorporate true modularity. This means we don't just offer customers a single expansion offer. We enable them to take on as much as they can afford, when they need it and in 2022 we put this into practice. In 2023 we want to expand on that.
