# Street light pole double solar bracket

## Overview

---

What is a street light pole bracket?

It is used for assembling the light mounting pole to the LED. The other end is affixed on the street light pole and is called the bracket base. The light pole bracket is mainly composed of flat steel and steel tube, both of which are new and do not come in any recycled form.

What is a solar street light pole?

A solar street light pole is a type of light pole designed to support solar-powered street lights. Aluminum is a common material used for making solar street light poles, which are generally more than 3 meters high and come in two varieties: aluminum alloy spinning light poles and casting light poles.

What is a split-type solar street light pole?

A Split-type solar street light pole is usually more than 5m in height with high gravity center while its solar panels are designed in hanging type to make the whole equipment set more wind resistant. Split solar street light's cost varies according to its materials, poles, and installation.

What types of brackets are available for a flood / street light?

Column spigot adaptors & reducers, Amenity post top brackets, Flood light brackets, Highway brackets & Outreach Arms, plus bespoke designs available. We manufacture a wide range of galvanised lighting brackets to ensure your Flood / Street or Amenity light is securely attached to the street lighting column / wall.

How do I choose the right lighting bracket?

In order to correctly specify / purchase the correct lighting bracket you will need to know the column diameter / column spigot size and maximum head load of the column. A selection of our most popular lighting brackets are listed below. However, please contact our sales team for further information and

technical support. You may also like.

What are the different types of lighting brackets?

Lighting Brackets - Column spigot adaptors & reducers, Amenity post top brackets, Flood lighting brackets, Highway brackets & Outreach Arms.
