

Solar Energy South Africa

Suncraft solar energy Hungary

Overview

Why is solar power growing in Hungary?

Solar power in Hungary has been rapidly advancing due to government support and declining system prices. By the end of 2022 Hungary had just over 4,000 megawatt (MW) of photovoltaics capacity, a massive increase from a decade prior. Relatedly, solar power produced 12.5% of the country's electricity in 2022, up from less than 0.1% in 2010.

What is the largest solar project in Hungary?

Duna Solar Park is located in Central Hungary in Pest County, near Százhalombatta, and is the largest solar project in the region. Like Kaba Solar Park, the MET group built it, and together the two solar projects have a capacity of over 50 MW. Built in 2019, Szügy Solar Park has a capacity of 16.5 MW and is the largest solar project in its county.

How much solar power will Hungary produce in 2022?

Relatedly, solar power produced 12.5% of the country's electricity in 2022, up from less than 0.1% in 2010. In 2023, the country's Minister of Energy, Csaba Lantos, predicted Hungary's target for 6,000 MW of PV capacity by 2030 would likely be exceeded twice over, hitting 12,000 MW instead.

How big is solar power in Hungary?

Solar momentum is building in Hungary with almost 4 GW of generation capacity, more than 2.5 GW of which is from arrays bigger than 50 kW in scale, according to data published in December by the Hungarian Energetic and Public Utilities Regulatory Authority. Attila Keresztes, CEO of Astrasun Solar.

What is the solar energy resource potential in Hungary?

Regarding solar energy resource potential, the sunshine hours in Hungary range from 1950–2150 hours annually, with the annual global horizontal solar

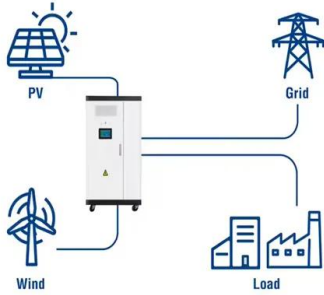

radiation received being 1280 kWh/m². These values characterise Hungary as having a comparatively high potential for solar energy exploitation [3].

Are grid constraints hampering the roll-out of large scale solar in Hungary?

Grid constraints are hampering the roll-out of large scale solar in Hungary. Solar momentum is building in Hungary with almost 4 GW of generation capacity, more than 2.5 GW of which is from arrays bigger than 50 kW in scale, according to data published in December by the Hungarian Energetic and Public Utilities Regulatory Authority.
