A Case for Solar-Powered Irrigation in Africa

Today SunCulture's product cost just \$400 per acre compared to over \$1,000 for traditional drip irrigation (typically powered by petrol generators due to lack of connectivity to the national grid). In addition to market competitiveness, SunCulture's use of alternative, clean energy makes it an attractive destination for capital.

Promoting the uptake of solar irrigation through innovative

...

SunCulture enabled farmers to benefit from the carbon markets by reducing prices, thus taking on the risk of carbon credit realisation in favor of offering reduced prices to its customers. For

SunCulture's entry-level product i.e., ClimateSmart Direct + RainMaker2, this represented a 25% reduction in price compared to true price.

The Future of Agriculture in Africa

In addition to our innovative products, SunCulture also provides smallholder farmers with training and support to help them understand and make the most of the technology. We believe that empowering farmers with the knowledge and skills to use technology effectively is key to the success of our mission read about our impact here <https://www.sunculture.io/impact>
