### Sunfix aero - Low-ballast flat roof system

Sunfix aero - Low-ballast flat roof system The name says it all: The Sunfix aero system is ideally suited for flat roofs with low load reserves that would typically not be able to support a solar system. The various models with a pitch of 10, 15 or 25 degrees can be optimized according to their specific yield and system capacity.

TechnicAL DeTAiLs

Low-ballast system: The Sunfix aero duo flat roof system is a low-ballast assembly system for flat roofs featuring a stable, fixed array. It creates an additional roof load of solar system behaves like a Formula 1 car at high speeds. The frame is pressed firmly down onto the roof, thereby reducing point and distributed loads to a minimum.

Flat roof mounting system

The Sunfix aero 2.0 provides you with all of the advantages of an economic flat roof system: It can be mounted onto industrial and commercial roofs without penetrating them. The system also has only a small number of main components, and guarantees fast and simple installation due to a significantly reduced system design.
