Sunset solar Saint Lucia

Overview

What time is perihelion in Saint Lucia island?

* All times are local time for Saint Lucia Island. They take into account refraction. Dates are based on the Gregorian calendar. Today is highlighted. Perihelion was on January 2, 2024 at 8:38 pm in Saint Lucia Island. The Earth was closest to the Sun at this time. The latest sunrise is on January 23.

How long does a sunset last in Saint Lucia?

While a sunset in the northern USA or central Europe can take almost an hour, in Saint Lucia, it lasts only an average of 25 minutes. In June, it's about 25 minutes in Castries, while in December it's 24 minutes. The capital Castries is located at 14 degrees north latitude and therefore also between the tropics.

What is the difference between sunrise and sunset in Saint Lucia?

Sunrise and sunset in Saint Lucia do not differ significantly throughout the year. The reason for this is the proximity to the equator. Thus, the sun swings north in the middle of the year and south at the turn of the year, without moving too far away. In countries like Canada or Norway, however, the difference is much more extreme.

When does the sun shine in Saint Lucia?

If a country like Saint Lucia lies between these tropics, the sun crosses its latitude twice a year and then shines vertically from above. For Castries, this is on April 27th and August 15th. In between, the sun shines from the north, otherwise from the south.
