- (in Swedish)

How many run-of-river power plants are there in Sweden?

From Sundsvall, we manage 74 run-of-river plants, located from Lycksele in the North to Kristianstad in the South. The plants have a combined capacity of about 1,600 MW and an average annual output of 8 TWh; this is about 12% of Sweden's total hydropower production. Karlshamnsverket is an oil-fired peak and reserve power plant.

Are there hydroelectric power stations in Sweden?

The following is a list of hydroelectric power stations in Sweden with a nameplate capacity > 100 MW. The electricity production from Swedish hydroelectric power stations cover around 45% of the Swedish electricity consumption. Wikimedia Commons has media related to Hydroelectric power plants in Sweden.

How much electricity does the transport sector use in Sweden?

The use of electricity in the Swedish transport sector is practically unchanged since 1980 (2.3 TWh). The total final energy use in the transport sector including aviation, international transports and renewable fuels has increased from 1990 to 2009 39% (91.4 TWh / 126.8 TWh) and from 2000 to 2009 21% (104.4 TWh / 126.8 TWh).

## Sweden 5kw power station

### Hitta din bästa power station - 500W, 1000W & 2000W
