

Solar Energy South Africa

Tajikistan pavilion renewables

Overview

Does Tajikistan have solar energy?

The potential of solar and wind energy in Tajikistan is quite high. The country is located between 36°40' and 41°05' north latitude. Meteorologists call this zone a "golden belt" of sunshine.

Is solar energy a viable alternative to electricity in Tajikistan?

According to the Agency of Hydrometeorology of Tajikistan, the duration of sunshine in the country is 2100-3166 hours per year, and the number of sunny days per year ranges from 260 to 300. This provides great opportunities for the use of solar energy as an alternative, especially in mountainous regions where there are no power lines.

What is the capacity of a solar power plant in Tajikistan?

The solar power station has a capacity of 220 kW. For comparison, the capacity of the smallest hydropower plant in Tajikistan - Varzob Hydropower Plant-3 is 3.52 MW, and the largest operating hydroelectric power plant - Nurek - 3000 MW and it generates 70% of electricity consumed in Tajikistan.

Does Tajikistan have a hydro power plant?

With abundant water potential from its rivers, natural lakes and glaciers, Tajikistan is almost exclusively reliant on hydro for electricity generation. It is home to some of the world's largest hydropower plants and is ranked eighth in the world for hydropower potential with an estimated 527 terawatt-hours (TWh).

Why is Tajikistan a good country?

Tajikistan is a country rich in hydro resources, the mountainous terrain and the presence of rivers allows the construction of high dams and large hydroelectric power plants (HPPs), which is done in the country - 95% of electricity is generated by 14 large and medium-sized HPPs. The use of

hydroelectric power stations in itself is [.]
