Solar and Battery Systems

The water (energy) will pour out of a big tap, but only trickle out of a tiny tap. For your home system, you want power sufficient to run real world equipment (a big enough 'tap'). For example, a kettle typically uses 2 kW for a few minutes. If your battery can deliver a power output at 2kW or above then it will all come from your cheap

Project Financing , Tangent Energy Solutions

EaaS enabled distributed energy assets generate lucrative long-term economic benefits, but high upfront capital costs can be a significant barrier for many customers. Discover how Tangent can leverage the long-term economic returns of EaaS to secure third-party funding, enabling customers to realize the benefits of DER assets with little or no upfront capital investment.
