A 10kW rooftop solar system will need between 25 and 27 solar panels. The actual number of solar panels it takes to make a 10kW solar PV system depends on the wattage of the solar panels. For example, if you install 300-watt solar panels, you'll need 34 panels to make a 10kW system. Can a 5kVA inverter run AC?

.

The costs of an off-grid solar power system is directly related to the amount of energy you are using. Another important factor is how reliable you want the power to be and whether you opt for including a backup generator or not. You can find a tool to provide you with an indication of the costs here (under development).
