How Long Can Solar Battery Power a House During an Outage?

Water heating accounts for an average of 18% of the total energy used in the household, or around 162 kWh per month. On a normal day, a water heater runs for around 2 to 3 hours a day, which means that it will consume roughly 4-5 kWh of electricity a day. Heat pump water heaters are more efficient and can run on around 2.5 kWh per day. But power outages ...

MG ZS EV to get smaller 40 kWh battery pack

According to a leaked document, the MG ZS EV is likely to be offered with a smaller 40 kWh battery pack. It seems, MG is either replacing the 44.5

kWh lithium-ion battery pack or could offer it as an option. While the smaller battery should offer less range, it is also likely to bring down the overall cost of the vehicle.
