

## Solar Energy South Africa

# The Gambia euler energy

## Overview

---

How can the Gambia benefit from a reliable energy supply?

More than 1,000 schools and 100 health centres in rural parts of the Gambia that currently have limited electricity access are expected benefit from reliable energy supply through new connections to the national energy network and provision of off-grid solar and battery systems.

How will 'solarisation' transform the electricity sector of the Gambia?

The project will transform the electricity sector of The Gambia via through the 'Solarisation' of up to 1000 schools and 100 health facilities especially the remote areas of the country. Furthermore it will provide beneficiaries in the education and health sectors with reliable and clean energy thereby reducing our carbon footprint.

What does the EU Global Gateway grant mean for the Gambia?

Today The Gambia, the EU and the EIB announced the signature of a €24.08 million EU Global Gateway grant to be used alongside an €8 million EIB loan to support the implementation of a renewable energy on and off-grid generation, transmission and distribution programme across The Gambia.

Are EU and EIB a strong development partner of the Gambia?

Once again it demonstrates that The EU and EIB are strong development partner of the Gambia. The project will transform the electricity sector of The Gambia via through the 'Solarisation' of up to 1000 schools and 100 health facilities especially the remote areas of the country.

Is the EU a good development partner for the Gambia?

Once again it demonstrates that The EU and EIB are strong development partner of the Gambia. The project will transform the electricity sector of The Gambia via through the 'Solarisation' of up to 1000 schools and 100 health facilities especially the remote areas of the country.

What are the different types of energy transformation in Gambia?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Gambia for 2021. Another important form of transformation is the generation of electricity.
