## ENERGY STORAGE SYSTEM

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

The diagram shows a vertical Energy Storage System (ESS) cabinet. It has a dark blue top and bottom. The main body is light grey with two vertical green lines running down the center. A central door is open, revealing internal components. The letters 'ESS' are printed in green on the upper right side of the cabinet. At the bottom, there are two yellow triangular warning symbols with a lightning bolt inside, indicating high voltage or electrical hazard.

## Overview

---

Will a new solar plant increase energy demand in the Gambia?

Energy demand in The Gambia has increased by 5.5% per year in recent years and today's connection of the new 23 MWp solar plant to the national energy grid will significantly increase Gambia's current generation capacity of 98 MW and enable electrification of rural areas. A strong commitment.

Why should the Gambia invest in a solar plant?

Further to this, as a clean energy source and a major vehicle for climate change mitigation, the solar plant will contribute to the realisation of The Gambia's Nationally Determined Contributions". Mr. Nani Juwara, Managing Director at National Water and Electricity Company (NAWEC) "The significance of this solar plant cannot be overemphasized.

Why is the World Bank partnering with the Gambia?

"The World Bank is pleased to join The Government of The Gambia to witness this remarkable milestone in the Energy Sector. This marks the first time in the Gambia's history where a utility scale solar plant of 23 Megawatts Solar PV capacity and 8-Megawatt hours battery storage is being commissioned.

Why is NAWEC launching a solar plant in the Gambia?

This marks the first time in the Gambia's history where a utility scale solar plant of 23 Megawatts Solar PV capacity and 8-Megawatt hours battery storage is being commissioned. This solar plant allows NAWEC to finally shift away from expensive heavy fuel oil-based generation which is costly and harmful to the environment.

What are the benefits of solar power in the Gambia?

Clean Energy: Produces 23MW of clean solar power, reducing greenhouse gas emissions and contributing to environmental protection. Energy Security: Increases energy independence and strengthens the stability and reliability of

The Gambia's power grid.

Is Gambia ready for a new era of renewables?

Gambia: strong international support for a new era of renewables with inauguration of historic 23 MWp solar plant A significant strategic project with strong substantial economic and social impacts, the recently inaugurated solar photovoltaic plant in Jambur is poised to supply electricity to approximately 18,500 households.
