The photovoltaic panel wires are exposed

Overview

What wiring methods are allowed in a photovoltaic system?

The 2017 NEC Article 690 Part IV Wiring Methods permits various wiring methods in photovoltaic systems. For single conductors, UL Listed USE-2 (Underground Service Entrance) and PV wire types are permitted in exposed outdoor locations in PV source circuits within the PV array.

Do PV systems need exposed cable wiring?

A common thread in the installation of electrical systems is that the work be done in a neat and workmanlike manner [NEC 110.12] and that conductors are not exposed to physical damage [NEC 300.4]. These two important concepts are at times overlooked in PV systems when installing exposed cable wiring methods.

How to wire solar panels together?

Wiring solar panels together can be done with pre-installed wires at the modules, but extending the wiring to the inverter or service panel requires selecting the right wire. For rooftop PV installations, you can use the PV wire, known in Europe as TUV PV Wire or EN 50618 solar cable standard.

What is Photovoltaic Wire?

Photovoltaic wire is a specific kind of wire created for PV applications. In the United States, PV wire is a single-conductor product that meets the requirements of UL 4703 Standard for Photovoltaic Wire. The current construction requirements outlined by UL 4703 are as follows:

Can a PV system use a single-conductor cable?

One of the most significant allowances for PV systems is the ability to use exposed single-conductor cables for the circuits within the PV array as called out in 690.31 (A). USE-2 and PV wire (a relatively new, double-jacketed single conductor cable) are specifically called out as acceptable conductors.

Can I use UL rated PV wire outside?

For single conductors, UL Listed USE-2 (Underground Service Entrance) and PV wire types are permitted in exposed outdoor locations in PV source circuits within the PV array. PV wire is further permitted to be installed in trays for outdoor PV source circuits and PV output circuits without needing to be rated for tray use.
