# The value of photovoltaic stocks with consecutive gains

## Overview

Are solar energy stocks a good investment in 2023?

To skip the detailed overview of the solar industry, go directly to the 5 Most Promising Solar Stocks According to Analysts. Solar energy stocks took a beating in 2023. Global X Solar ETF (RAYS) and Invesco Solar ETF (TAN) are down 41.38% and 29.83% for the year, respectively.

How did solar PV stocks perform in 2020?

Solar PV stocks performed exceptionally well in 2020. The TAN (an index tracking the solar industry) gained 233.6% compared to the S&P 500 and the Dow, which increased by 16.3% and 7.2%, respectively. The top five solar PV stock performers in the U.S. market for December were ReneSola (SOL),, Daqo New Energy (DQ),, Enphase Energy (ENPH),, Canadian Solar (CSIQ),, and SunPower (SPWR), which increased by 45%, 42%, 36%, 22% and 21%, respectively.

Are solar stocks a good investment?

Solar stocks posted significant gains following the law's passage as demand for solar products increased. Two significant advantages of investing in solar stocks include the overall growth of the energy industry and the rapid growth in demand for alternative energy sources.

What's going on with polysilicon stocks in the solar industry?

On average, polysilicon stocks (Daqo GCL-Poly, REC, and Wacker) have dropped 49%. In comparison, module manufacturers (Canadian Solar, First Solar, Hanwha, JinkoSolar, and SunPower) have decreased 15%, and equipment manufacturers (Amtech, centrotherm, Intevac, Manz, Meyer Burger, and PVA) have experienced a decrease of 17%.

Why are solar stocks a bearish investment?

The high-interest rate environment made a bearish case for solar stocks throughout the year due to a demand drop among retail customers. Moreover, California’s Net Energy Metering 3.0 policy has reduced incentives for rooftop solar owners drastically.

Did solar stocks outperform the market last month?

Last month, solar stocks outperformed the market with the Guggenheim Solar ETF (TAN) increasing 13.5%, compared to the S&P 500 and Russell 2000's gains of 1.1% and 1.9% respectively. This substantial gain can be attributed to strong earnings from Daqo (DQ), SolarEdge (SEDG), and First Solar (FSLR), which increased 34%, 27%, and 62% respectively.
