✓ IP54/IP55

✓ BATTERY 6000 CYCLES

Overview

How do you fix a solar light not working?

To fix solar lights not working, check and remove the battery pull tab, replace or deep charge the batteries, repair any damaged wiring, clean the solar panels, and ensure they're positioned in direct sunlight. [How Do You Reset a Solar Light?](#)

.

Why is my solar light not working?

One of the most common reasons why your solar light isn't working is the wire between the solar panel and the battery. This wire is responsible for transferring the generated electricity from the solar panel to the solar battery — charging it in the process. If this wire is broken, then your batteries won't charge no matter what you do.

Why is my solar panel not working at night?

The solar panel needs sunlight to recharge the battery, so if the panel is in a shady spot, the battery may not get enough power to operate the light at night. Keep the light sensor clean. Dust and dirt can accumulate on the light sensor and prevent it from activating. Use a soft cloth to wipe away any dirt or debris. Check the batteries regularly.

Why does my solar light come on?

If doing this causes the light to come on, then the sensor is working. By troubleshooting your solar lights you can usually determine whether or not the problem lies with the sensor or not. You can fix your solar lights by properly maintaining them so you can make sure your solar lights turn on when they need to.

What happens if solar lights don't charge the batteries?

Sometimes solar lights will have the batteries stored in the solar panel, other times the batteries will be stored in the light head itself but ultimately if the panel can't charge the batteries or the batteries charge can't reach the lamp you're going to be in for a disappointing light show.

Why is my solar garden light not working?

Most of the outdoor solar garden lights come with ON/OFF button, and that button needs to be turned ON. In many cases this simple thing is ignored by many people and this is one of the main reasons why your solar light isn't working as expected. There might also be a factory defect and the light doesn't turning ON. 2.
