Tibox battery Djibouti

Overview

A battery is a modified lithium-ion battery that uses lithium-titanate nanocrystals, instead of , on the surface of its . This gives the anode a surface area of about 100 square meters per gram, compared with 3 square meters per gram for carbon, allowing electrons to enter and leave the anode quickly. Also, the redox potential of Li^+ intercalation into titanium oxides is more positive than that of Li^+ intercalation into graphite. This leads to fast charging (hi.

multi-technology lithium-ion battery systems by Leclanché®

EXPO21XX presents multi-technology lithium-ion battery systems by Leclanché The TiBox can be fully charged or discharged within one hour. It is, to the greatest possible extent, tolerant against temperature variations. A storage system for all who demand the highest standards of innovative technology and sustainable longevity.
