Transporter energy Cabo Verde

Overview

Will Cabo Verde replace fossil fuels with electric vehicles by 2050?

The Government of Cabo Verde has set itself the goal of replacing the country's entire vehicle fleet with electric vehicles by 2050. Locally generated electricity from renewable energy sources is to replace imported fossil fuels in road transport.

Does Cabo Verde have a plan to promote electric mobility?

The Government of Cabo Verde is successfully implementing its strategy to promote electric mobility. The project offers financial incentives via MICE, accomplished through a grant agreement between the German Government and MICE, to encourage people to buy electric vehicles.

What is the energy sector in Cape Verde?

Cape Verde energy sector is strongly characterized by consumption of fossil fuels (derived oil-primary imported oil), biomass (wood) and use of renewable energy particularly wind and solar power.
