

## Solar Energy South Africa

# Trinity photovoltaic panel production site

## Overview

---

Where are photovoltaic solar modules manufactured?

First Solar Inc., an Arizona-based solar energy company, plans to manufacture photovoltaic solar modules at a new plant in Trinity, Alabama. The company announced an investment of more than \$1 billion in the new factory located in a Northwest Alabama industrial park.

Where are solar panels made?

The company also operates manufacturing facilities in Ohio and a soon-to-be-opened plant in Louisiana. The Lawrence County facility “produces American solar panels, with American-made components sourced from a supply chain that spans the country,” Widmar said.

Will first solar build a new factory in 2022?

In August 2022, First Solar also announced its intent to build its fourth domestic factory with an annual capacity of 3.5 GWDC, in the US Southeast. The company expects to invest up to \$1 billion in the new factory.

Why do PV power plants need a low cost SCADA system?

It is essential to have a low cost SCADA to ensure real time performance monitoring , quick fault recognition and user defined control options to enhance the plant performance and maximum yield of PV power plant.
