

Solar Energy South Africa

Tripol sistem energy Guinea-Bissau

Overview

Who manages the electricity sector in Guinea Bissau?

The National Electricity and Water Corporation (EAGB) manages the electricity sector in Guinea Bissau. On a regional level, the country is a member of the West African Power Pool. The main sector policy is the National Energy Policy 1995, and more recently, the Energy Master Plan of 2013.

How will solar power work in Bissau & Gabu?

In Bissau, solar photovoltaic (PV) plants will help reduce the average cost of electricity in the country and diversify the energy mix, while battery storage will help integrate this variable energy source into the grid. In Bafata, Gabu and Cacheu, the PV plants will provide cheaper and cleaner local power generation than current diesel production.

Does Guinea-Bissau have a dual energy economy?

Guinea-Bissau has a dual energy economy based on domestic wood- fuels and imported oil. About 90% of total energy consumption is accounted for by firewood and charcoal, which are used in almost all households for cooking as well as in traditional rural, commercial and artisanal activities.

Is Guinea-Bissau a viable energy resource?

The coast of Guinea-Bissau, with its deeply indented coastline, experiences high tidal range values making this a commercially viable energy resource. The highest mean annual tidal amplitude of 3.4 m was recorded at Porto Gole, on the banks of Rio Geba and could generate 50 MW of electricity (REEEP, 2012); (DICAT, undated).

What is the energy situation in Guinea-Bissau?

SUMMARY Energy Situation and Priorities 1. Guinea-Bissau has a dual energy economy based on domestic wood- fuels and imported oil.

How much electricity does Guinea Bissau use?

Putting all these figures together, the total consumption of electricity in Guinea Bissau may be estimated at 25.0 GWh, for which 34.3 CWh were generated using 9,257 toe of gasoil. 2.7 The uncertainty associated with the estimate of total electricity consumption shows that it.
