True or false of Chint solar photovoltaic panels

Overview

Are Chinese solar panels safe?

If you want to be ultra-safe – choose a Chinese panel on that list. But. there are still good Chinese panels which are not on that list, and they may be much cheaper, potentially saving you thousands on your solar system.

Are solar panel suppliers more innocent than the retailer?

Suppliers are more innocent than the retailer. The other funny thing is, these Solar panel suppliers are really rich, but they were not getting rich from Solar panel, Solar Panel is a new business, the above suppliers are good is only because they got funds to make it big, and in Solar business, Big means good.

Are Chinese solar panels approved of?

In early January (2014) those fun guys in the Chinese Government released a list of Chinese solar panel manufacturers that they approved of. What does 'approved of' mean?

Well, the Chinese polities assure us that they've had an "expert review" of over 500 companies and assessed them on "solar panel manufacturing norms and conditions" such as:.

Are solar panels reliable?

These are the panels we know to be reliable and well supported and is based on what we hear from solar installers. Most of them are tier one which simply means large financial organizations are willing to lend money to solar farms using them. Dumping is only acted on if affecting local manufacturing. Not sure what happened there!.

Are solar panel suppliers really rich?

The other funny thing is, these Solar panel suppliers are really rich, but they

were not getting rich from Solar panel, Solar Panel is a new business, the above suppliers are good is only because they got funds to make it big, and in Solar business, Big means good. You have whole Production and QA and Sales and Service in a line.

What do you know about solar panels?

If you are looking at a panel isn't in the graphic you can let us know and we'll tell you what we know about it. Some panel are good quality but rarely used in Australia, while others are shoddy and should definitely be avoided. These are the panels we know to be reliable and well supported and is based on what we hear from solar installers.
