Tunnel solar generator light

Overview

What is a sun tunnel?

Sun Tunnels are also referred to as Sun Tubes, Solar Tubes, Light Tunnels, Solar Pipes and Tubular Skylights. Sun Tunnels are a perfect option for providing natural light into corridors, stairwells, bathrooms, small rooms and cupboards, under pitched or flat roofs, where installation of a roof window or flat roof rooflight is not possible.

What is a light tunnel?

A light tunnel, also known as a solar tube, sun tube, and light tube, is a tubular skylight that works by directing sunlight into interior spaces through a highly reflective tube. They are a hugely effective and popular method of bringing light into your home, where traditional windows and skylights/roof windows may not be able to.

How do light tunnels work?

Bring daylight directly into your home using our Light Tunnels or Light Tube Skylights. What is a Light Tunnel?

A light tunnel, also known as a solar tube, sun tube, and light tube, is a tubular skylight that works by directing sunlight into interior spaces through a highly reflective tube.

What are Sun Tunnels and how do they work?

Also known as sun tunnels light tubes, light pipes or tubular skylights, these are a new way to get natural light into your home. They can transform spaces that sunlight would not normally reach, such as hallways and passages, and they are gaining popularity as an alternative to artificial lighting. What are sun tunnels?

.

Can a sun tunnel light a room?

Rooms with limited possibility for a traditional roof window, and rooms, you can otherwise only light up with artificial lighting. If you have a bathroom with no windows, a dark corridor or dull wardrobe space, you can benefit from a sun tunnel.

What is a lightway Crystal Sun tunnel?

Lightway Crystal Sun Tunnels bring in fresh sunlight into spaces where a window or skylight is not possible. A daylight tube helps to save expenses on electricity.
