

## Solar Energy South Africa

# Turks and Caicos Islands wind energy companies in

## Overview

---

We deliver the most efficient solar power and wind turbine renewable energy solutions to the Turks & Caicos Islands and remote off-grid businesses. Solar Island Energy has been helping Turks & Caicos Islands resorts and companies save time, money and energy, and increase value for many years. When we.

Planning, Design, Construction, Installation, & Maintenance 1. Solar energy: solar PV & microgrid systems, beautiful solar structures 2. Wind turbines 3. Electric vehicle charging.

With Solar Island Energy's highly experienced, diverse team of licensed professionals and our free, no-obligation assessment, now is a great time to evaluate your energy.

Who provides electricity in Turks and Caicos?

Together, both companies provide electric power in Turks and Caicos to over 15,000 customers and are regarded as one of the most reliable electricity providers in the Caribbean. FortisTCL offers customized energy audits to help customers achieve greater energy efficiency and savings.

Could ocean thermal energy help Turks and Caicos meet its peak demand?

Once wave and ocean thermal technologies are proven in the marketplace, ocean energy and ocean thermal energy conversion have potential as well. Abundant wind and solar resources, as well as the potential for other renewable sources could help Turks and Caicos meet or exceed its peak demand of 34.7 MW.

What is the wind condition in Turks and Caicos?

The wind condition in Turks and Caicos is characterized by the most predictable and consistent east-southeast trade winds. These winds are typically experienced on and off throughout the year, although they are a bit more pronounced and regular in the spring and winter months.

Who owns Turks & Caicos utility limited (TCU)?

Turks & Caicos Utility Limited (TCU) is wholly owned by FortisTCI and provides electricity to Grand Turk and Salt Cay. In 2010, the government of Turks and Caicos contracted with a consultant to draft recommendations for exploring the use of renewable energy and energy efficiency technologies to create a more sustainable energy framework.

How much does electricity cost in Turks and Caicos?

The 2015 electricity rates in Turks and Caicos are \$0.29 per kilowatt-hour (kWh), slightly below the Caribbean regional average of \$0.33/kWh. Like many island nations, Turks and Caicos is almost 100% reliant on imported fossil fuel, leaving it vulnerable to global oil price fluctuations that have a direct impact on the cost of electricity.

Does Turks and Caicos have a policy on energy efficiency?

Turks and Caicos has few policies related to energy efficiency and renewable energy. Historically, the territory has not implemented policy mechanisms to aid in the development of clean and energy-efficient technologies.
