

Solar Energy South Africa

Türkiye cic energigune gigafactories

Parallel (Parallel operation up to 6 unit (only with battery connected))

AC input wires

AC output wires

Overview

What is CIC energigune?

This work is part of the European project GIGAGREEN, in which CIC energigUNE participates along with other 15 entities of the continent, and which is entirely funded by the EU through the Horizon Europe program.

Are Gigafactories coming to Europe?

Iñigo Careaga, business analyst at CIC EnergiGUNE, a research centre benchmarking gigafactory developments across Europe, tells fDi that the continent is currently in “the eye of the storm”, with more gigafactories expected to be announced before the end of the year.

How has the European Gigafactory industry changed over the last month?

All this, while waiting for the new aid plan that the Government has announced for this year, charged to European funds and expecting to boost the electric and connected vehicle industry. As can be seen, over the last few months the European gigafactory industry has picked up speed and shape.

Why is the European Gigafactory industry booming in 2022?

As can be seen, over the last few months the European gigafactory industry has picked up speed and shape. Above all, thanks to the entry of large automakers that have enabled the development of the industry. However, the year 2022, which has just begun, seems to be key to its definitive boost, mainly for two reasons.

Türkiye cic energigune gigafactories

The battery industry's new strategy: Cross value

The reason for these moves is clear, especially with regard to the initial stages (such as material extraction or processing): to ensure the entire value chain and its deployment now that the industry is still in an incipient state and with some phases of activity "limited" (such as supply itself, due to the potential shortage of raw materials in the coming years).

How is the green investment fight progressing around the world?

Many of these gigafactories in Asia are already operational, with ambitious expansion plans. In particular, From CIC energiGUNE, we will continue to watch closely and give echo to global developments within the industry of green technologies such as batteries. All this while we remain committed to contribute to the technological evolution

Who are the big players in the gigafactories race? , CIC energiGUNE

Europe or North America is making a strong commitment to the industry associated with gigafactories, with the aim of positioning themselves as hubs of reference in the battery sector; an industry with high impact and future potential. CIC energiGUNE collaborates with an extensive network of agents, universities, research centers, companies
